

Ethernet over Copper

American Telephone Company's Ethernet over Copper (EOC) services are becoming more and more popular as large bandwidth requirements are needed. Where available, this technology supports high-speed internet bandwidth for a fraction of the cost of traditional Ethernet connections.

Benefits:

- Bandwidth available from 3Meg to 10Gig and growing
- Low network latency
- Fast installations
- Static IP addresses

Flexibility:

- Grows with your business, add additional bandwidth in days not weeks
- Ethernet handoff

Savings

- A flat rate solution that is neither mileage nor usage sensitive
- Cost effective for high bandwidth requirements
- A guaranteed rate – American Telephone Company guarantees your rate in writing, for the entire term of your contract
