

## Point to Point

American Telephone Company's private line service provides digital quality point-to-point connectivity for delay sensitive applications, or for traffic that warrants a secure full time private connection.

### Benefits:

- Local, Long Distance & International connections available
- Multiple transmission speeds from 1.544M through GigE
- Support for multiple applications (voice, video and high-speed digital data).
- Reduce inter-office calling expenses
- Increase inter-office productivity with 4 digit dialing

### Flexibility:

- Disaster recovery service for both voice and data
- Can provide least cost routing for voice services

### Savings:

- Fixed monthly cost
- Volume and term discount plans provide substantial savings on already competitive ATC rates
- A guaranteed rate – ATC guarantees your rate in writing, for the entire term of your contract.
